Allianz

Rebuild Better

A BENEFIT EXCLUSIVE TO ALLIANZ CUSTOMERS

At Allianz, our policies are designed to protect not only your home but also the environment. We also know when something happens to your home it can be a challenging and stressful time. But with Rebuild Better, we want to make things a little bit easier for you. Rebuild Better is an exclusive benefit available to Allianz Home Insurance customers who have buildings cover. If you make a claim of €50,000 or more on your policy you will be offered €6,000 on top of your claim to make sustainable energy improvements to your home, such as a heat pump system or wall insulation.

With the variety of great home upgrades available, choosing the best options for your needs can be challenging. That's why we've included a home energy technical assessment service to guide you in making informed decisions.

How does it work?

If you have unfortunately experienced a claim to your buildings, you can email propertydamage@allianz.ie or call 01 6133990 and one of our experienced claims advisors will be on hand from 9am-5pm Monday to Friday.

- A loss adjuster will be appointed and will get in touch with you to inspect the damage to your property within 3 working days. This may take longer during busy periods like after severe weather event.

- If the claim is valued at €50,000 or more, the loss adjuster will advise you of the Rebuild Better payment that is available, provided you go through the Sustainable Energy Authority of Ireland (SEAI) grant process and get approval for an SEAI home energy upgrade grant. They will also share the details of our technical assessment consultants, who you can contact to arrange a free home energy technical assessment.

- Once the assessment is complete, you will receive a detailed report of your home's energy efficiency, including tailored options for energy improvements.

- Your SEAI registered contractor will share information on the completed works with the SEAI & you will receive your grant funding (if applicable).

- Your SEAI registered contractor must then send your receipt of SEAI grant funding and statement of works to Allianz (propertydamage@allianz.ie). We will review the application to verify that the address listed for the claim matches the location where the sustainable home energy upgrades were implemented.

- Allianz will then pay €6,000 to the SEAI registered contractor after completion of the upgrades.

Does any claim over €50,000 qualify for Rebuild Better?

Claims over €50,000 under the premises section of the policy for losses such as but not limited to burst water pipes, fire, flood, storm, subsidence qualify for Rebuild Better once the SEAI grant is approved. Claims under the contents section of your policy do not qualify.

What happens to my claim with Allianz?

Should you wish to take advantage of the Rebuild Better benefit, the process will proceed independently of your original claim. Your claim with Allianz will progress as normal and will not be impacted because of your SEAI grant application.

What energy efficiency improvements can I make to my home?

Depending on the upgrades you are looking to make, you can choose one or multiple home energy upgrades. The SEAI grants you can apply for include multiple options, from attic and wall insulation to installation of heat pumps and solar panels. Allianz will provide €6,000 net of SEAI grants to support your sustainable home improvements.

Does the benefit apply if there is a total loss at the property?

No, the additional payment of €6,000 does not apply in the event of a total loss. The reason for this is that, in an event of a total loss, your property must be rebuilt in line with the current building regulations which will include some of the features provided by SEAI grant.

Who will make the sustainable improvements to my home?

A registered SEAI contractor will carry out the work once you receive approval for an SEAI grant. You must ensure grant approval is in place before proceeding with works to avail of the Rebuild Better funding.
