CyberPrepare - making sure you're ready

The threat from cyberattacks is growing - and it's a risk that all companies face. At Campion Insurance we are here to support our clients with the immense challenges cyberattacks represent.

Campion Insurance CyberPrepare, is a low-cost tool specifically designed to test and assess your organisation's cyber resilience, advise on the level of cyber preparedness you have in place, and gives an overview on your readiness to address cyber incidents.

CYBERPREPARE COMPRISES TWO KEY COMPONENTS:

A cyber profiling scan:

A non-invasive scan of your domain alerts you to information that attackers could use to profile your business and identify security gaps. Viewing your exposure from an attacker's perspective helps optimise your online presence, modify information, and limit access points, increasing resilience to cyberattacks.

A cyber questionnaire:

A questionnaire that identifies risk from a defender's perspective, giving insight into your cyber preparedness and security posture. Security controls are categorised into ransomware, phishing, social engineering, business email compromise, and third-party vendor compromise.

OUTPUT AND RECOMMENDATIONS:

Once both components have been completed, CyberPrepare will provide you with a resilience report that not only provides an overview of your current cybersecurity, but also clearly sets out:

Findings

Areas where action should be taken to remediate risk

Observations

Areas that may have deeper implications and require further investigation

Insights

Areas that may give attackers intelligence about your online presence

All the findings are made available through a secure online portal.
